

pdfToolbox

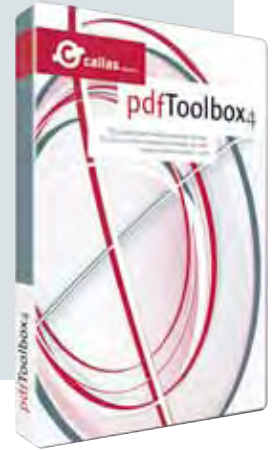

The all-in-one PDF production toolkit
that's **powerful and easy-to-use**

callas **pdfToolbox 4** gives all aspects of working with PDFs a massive boost with a greatly extended feature set to match a diversity of users' needs. From preparing presentations and multiple-language versions to imposition and advanced color management, pdfToolbox 4 will prove indispensable for getting your PDFs right in record time.

The all-in-one PDF production toolkit that's powerful and easy-to-use

Benefits

- Wide range of users can benefit from diversity of tools
- Performing complex tasks is easier than ever due to ground-breaking and appealing user interface
- Production tools guarantee complete control and highest quality PDF output
- Saves time in document preparation and modification
- Ensures compliancy with ISO standards
- Presentation tool boosts communication and appeal of PDF-based slides and handouts
- Reduces software costs by creating document versions directly from the PDF
- Support and updates are only a click away through the user interface

Key features

Powerful document manipulation tools for everyone

- Appealing user interface that adds tremendous fun to dealing with PDFs
- Easy access to frequently needed tools through personal workspaces
- Prepares professional looking handouts and presentations for on-screen and printed delivery
- Easily creates language or regional versions with extensive support for localization workflows
- Imposes anything from simple booklets to fully-fledged brochures and books, as well as N-up and Step&Repeat impositions for digital printing
- Options to scale, fit, move, extend, rotate and flip pages and content
- Localized versions are available in Spanish and Italian as well as English, German, French [New in 4.2]

And production tools for the specialists

- Standards supported include PDF/X-1a, PDF/X-3, PDF/X-4 and PDF/X-4p as well as Ghent PDF Workgroup specifications
- Font controls include embedding, subsetting already embedded fonts (saving up to 50% space over other subsetting tools), replacing fonts and converting to vector outlines
- Keeps font names unique and prevents font caching problems when combining PDFs using subsets of the same font [New in 4.2]
- PDF Layer Viewer manages and generates layer views and allows to generate layers in accordance with PDF/X-4 [New in 4.2]
- pdfToolbox 4 includes Dynamic Profiles that allow variable parameters to be defined at runtime. pdfToolbox 4 Dynamic Profiles can be adjusted on the fly and checks and fix-ups can be dynamically switched on or off, creating incredible versatility in your workflow [New in 4.2]
- Prepress Pro Companion can replace an incorrectly defined output intent, modify overprint and knockout for black and white, adjust TVI and more

Professional color management for non-experts

- Includes the world's most powerful color tools: adjust for type of output with a click; conversion to B/W that just works; converts RGB in Office PDFs to printable CMYK; sophisticated spot color handling
- Processes all grey elements consistently (whether DeviceGrey, DeviceCMYK, DeviceN or Separation), and enables dot-gain compensation (for both process and spot colors)
- New advanced color mapping to map between various color spaces including RGB to CMYK or vice versa Spot to Spot, Spot to CMYK or RGB, and RGB or CMYK to Spot [New in 4.2]
- DeviceLink add-on for smooth CMYK to CMYK conversion (payable option). Includes a series of most-used profiles for standard printing processes

Get the most out of metadata

- Provides convenient browsing of document metadata as well as object-level metadata for images embedded inside the document
- Support for all relevant industry metadata standards including Dublin Core, IPTC, PRISM, GWG AdTicket/AdsML, PLUS, EXIF and Camera Raw
- Facilitates metadata based researching in Yahoo, Wikipedia, Amazon, Google and AskMetaFilter
- Supports GPS data for use with Google Maps, OpenStreetMap and Google Earth

System requirements

Runs with any of the following versions of Adobe® Acrobat®: Adobe Acrobat 8 Professional, Adobe Acrobat 8 3D, Adobe Acrobat 9 Pro, Adobe Acrobat 9 Pro Extended (pdfToolbox 4 does not run with Adobe Acrobat Elements, Adobe Acrobat Standard or Adobe Reader)

The following operating systems are supported:

Mac OS X, version 10.4 or newer. Windows 2000/2003/XP/Vista
